Driven and detail-oriented Software Developer with hands-on internship experience building scalable server-side systems. Demonstrated success in designing API routes and database schemas for a Distributor Management System using JavaScript, Node.js, and PostgreSQL. Proven collaborator skilled in agile workflows and strict GitHub version control to ensure stable, reliable deployments.

PROFESSIONAL EXPERIENCE

Zhiyuan Enterprise Group Inc. , 32nd st.

Corner 9th ave, Makati City

February 2026 - May 2026

Backend Developer

- Developed and optimized backend services for a comprehensive Distributor Management System utilizing JavaScript, Node.js, and PostgreSQL.
- Designed and implemented RESTful API routes to enable real-time tracking and management of distributor profiles, financial transactions, sales metrics, and inventory data.
- Collaborated within an agile development team using GitHub for version control, ensuring 100% commit traceability, seamless branch merges, and synchronized deployments across multiple environments.

TECHNICAL SKILLS

- Programming: Java (fundamentals), object-oriented programming concepts
- Software Development: Basic knowledge of SDLC, debugging, and code documentation
- Systems Administration: User account management, system configuration, basic troubleshooting
- Databases: Basic understanding of databases, SQL fundamentals
- Tools & Technologies: Familiarity with IDEs (e.g., NetBeans, IntelliJ), basic version control concepts
- Problem Solving: Ability to analyze technical issues and apply logical solutions
- Cybersecurity Awareness: Basic understanding of system security and best practices

TECHNICAL SKILLS

- Technical Communication: Able to explain technical concepts clearly to non-technical users
- Team Collaboration: Experience working in team-based development and academic projects
- Time Management: Effective at prioritizing tasks and meeting project deadlines
- Adaptability: Quick learner of new technologies and tools
